LazyApe Reboot – Whitepaper Final

LazyApe is back — but this time, it's real. After a failed Web3 game left the LazyApe token drifting in uncertainty, a new independent developer (lazyape dev) took over and rebuilt the project from scratch.

This whitepaper defines the final version of Lazyape, focused on transparency, sustainability, and community-first growth on the Solana blockchain.

Token Overview

• Token: Lazyape
• Network: Solana
• Total Supply: 5,000,000,000
• Owner: lazyape dev
• Use Cases: Presale, Airdrops, Future ecosystem utilities

Token Allocation

• 20% – Presale & Fair Launch
• 30% – Community Rewards & Airdrops
• 30% – Liquidity & Ecosystem Growth
• 10% – Development & Treasury
• 10% – Team & Contributors

Vision

Our goal is to build a real, grassroots crypto project — not backed by hype or false games, but by real people. Lazyape is your entry to an evolving ecosystem that prioritizes fairness, inclusion, and transparency.
